

◆ Animal Medical Center of Chicago ◆

Your Name: _____ Pet's Name: _____ Date: _____

A long, healthy and happy life for your pet is our top priority at Animal Medical Center of Chicago. We recommend twice yearly health examinations for all pets over 10 years of age (7 years of age in large breed dogs). Dogs and cats age rapidly, so it is crucial to be on the look out for warning signs of any potential health problem.

Please answer the following questions to help us provide the best care for your pet:

Have you noticed any changes in your pet's appetite? YES NO

Has your pet gained or lost weight? YES NO

Has your pet's water intake changed? YES NO

Have you noticed a change in your pet's energy level? YES NO

Have you noticed your pet having difficulties walking, jumping or climbing stairs? YES NO

Does your pet appear to be in pain? YES NO

Does your pet seem lethargic? YES NO

Have you noticed your pet urinating more frequently? YES NO

Does your pet have any urine leakage? YES NO

Does your pet strain to urinate or defecate? YES NO

Does your pet have bad breath? YES NO

Does your pet have any difficulties chewing or playing with toys? YES NO

Does your pet have soft, loose or very firm stools? YES NO

Does your pet vomit regularly? YES NO

Does your pet cough or sneeze? YES NO

Does your pet have any eye or nose discharge? YES NO

Does your pet scratch its ears or shake its head? YES NO

Does your pet itch more than usual? YES NO

Does your pet seem disoriented? YES NO

Have you noticed any changes to your pet's coat? YES NO

Does your pet have any lumps/bumps you would like us to evaluate? YES NO

Does your pet still want to participate in your family's activities? YES NO

Does your pet still greet you when you come home? YES NO

Please list the food, treats, supplements or medications you regularly give your pet:

In addition to your pet's twice yearly physical examination, we recommend a Senior Wellness Laboratory Profile for your pet. The Senior Wellness Profile includes a CBC to evaluate your pet's red and white blood cell count, a chemistry profile to evaluate your pet's liver, kidneys and other metabolic functions and a urinalysis.

Would you like to have this performed today? YES NO

For a more extensive Senior Wellness examination, we recommend the following: CBC, Chemistry, Thyroid Profile, Urinalysis, Chest and Abdominal Radiographs and ECG. We recommend that you schedule in advance a drop off appointment for your pet to be evaluated and an afternoon consultation appointment with your doctor to review our findings.

Would you like more information about this comprehensive evaluation? YES NO

Thank you for completing this questionnaire, and for entrusting us with your pet's care. Your answers will be very helpful in guiding us in our assessment of your pet's general well being.
